Double-wrapped and formed to a given diameter, ready for application

Non-spring coiled to a given diameter but not laced up through the lok.

Double-wrapped, triple locked Punch-Lok clamps hold things tightly, securely, permanently!

TO ORDER: Measure the outside diameter of the hose with its fitting inserted. Then select the next larger inside diameter clamp by catalog number. Using the hose size in inches is not sufficient information, because different thickness of hose wall result in varying outside diameters. Punch-Lok clamps are available in various materials to suit your needs. High-strength galvanized carbon steel clamps will satisfy nearly all requirements. Stainless steel clamps are for use in more corrosive situations. Evendur copper-base clamps are also available on special order.

Double-wrapped, triple locked Punch-Lok clamps hold things tightly, securely, permanently!

Everdur clamps are made of a copper based material and are extremely anticorrosive, and non-magnetic. Other sizes and materials such as Monel may be produced. Consult factory for availability. Minimum quantity is one standard carton.

Non-spring coiled to a given diameter but not laced up through the lok.

TO ORDER: Measure the outside diameter of the hose with its fitting inserted. Then select the next larger inside diameter clamp by catalog number. Using the hose size in inches is not sufficient information, because different thickness of hose wall result in varying outside diameters.

PUNCH-LOK J-LOK clamps have stainless steel/buckles for added strength and corrosion resistance – with your choice of stainless steel or high-strength galvanized carbon steel bands. Totally different than punch-type clamps, **these J-LOK clamps are not for use with punch-type tools.** They are designed exclusively for application with non-punch type mechanical and air tools.

P-1000™ Loking Tool "The Punch-Lok Tool"
 The original. Made like no other tool! Designed for fast, economical application of punch-type clamps. The portable P-1000 weighs only 2 1/2 pounds. Drop forged and double plated tempered steel construction.

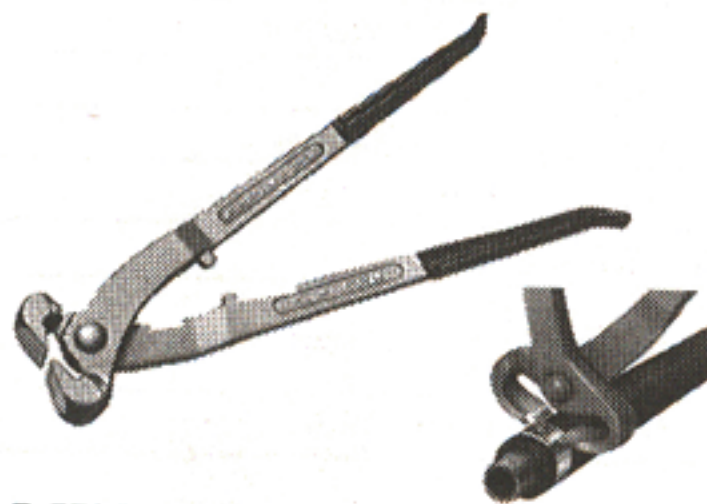

P-3000™ Loking Tool
 Similar to the Model P-1000, the Model P-3000 is for application of 3/8" wide punch-type clamps only. It will not fit 5/8" wide clamps. Double plated.

P-38™ Clamp-Master® Tool Set
 The original, handy, low cost tool set for applying punch-type clamps. Weighs less than one pound. Excellent for confined working areas and for on-job repair and replacement work. Fits 3/8" and 5/8" wide clamps. Double plated.

PB-001 Banding Tool
 Forged double plated tensioning tool with built-in cutter for banding and buckle application. Also can be used with PJ-001 for J-Lok Clamp installation.

D-550™ Clamp Cutter
 Powerful 14" cutter removes any punch-type clamp with minimum effort. Rugged drop forged heat treated high-carbon steel construction. Double plated. "All New Design"

D-225-A™ Mallet
 Specially designed for the punch-locking step in applying punch-type clamps. Malleable iron head has softer striking surface for long tool life.

K-52™
Clamp-Master
kit with high-strength
galvanized carbon punch-
type steel clamps in steel case.

Lok-Mender, 1 Groove

Lok-Mender, 2 Grooves

Punch-Lok single and double groove hose fittings of all types are designed and engineered for use with Punch-Lok Clamps to make connections which will withstand high pressure services. The shape of the grooves eliminates damage to the inner wall of the hose. The Punch-Lok Clamp brings the hose wall into the grooves with even compression around the fitting. Carbon Steel steam hose fittings are available in sizes ranging from 1/2" to 1" and include tie wires. Hex Steel Lok-Nipples are cut from hexagon shaped cold rolled steel bar stock with full thread and tapered end for easy application.

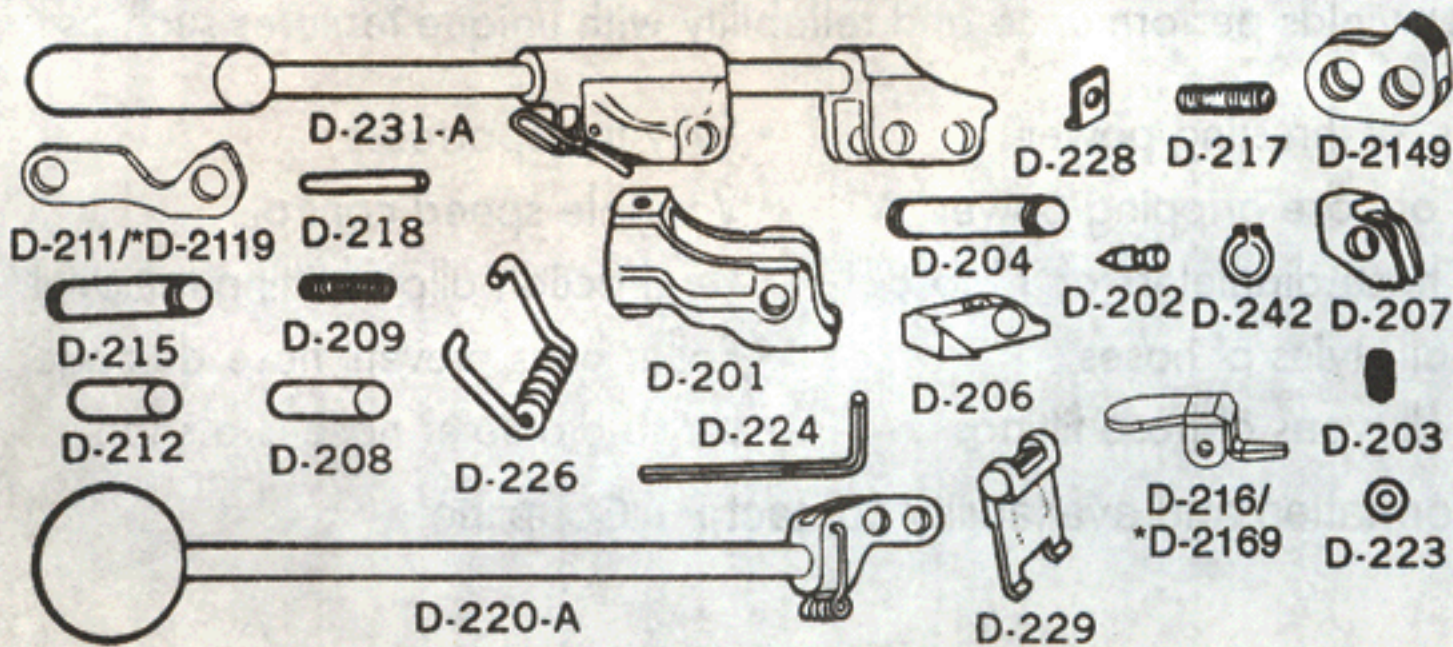

Lok-Nipples are manufactured in standard iron pipe sizes. All Lok-Menders are manufactured in standard iron pipe sizes except for 1/2" and 5/16" where it is necessary to use brass for a good inside diameter fit. All fittings are plated as standard except for brass fittings.
