

Standard Air Tool S750

For high volume production clamping of all widths and sizes of BAND-IT Jr. Smooth I.D. and Preformed clamps. Automatically tensions and cuts off clamp tail after locking. Operated on 80-120 p.s.i. air line pressure. Table top mounting with foot pedal operation. The Automatic Air Tool complete assembly consists of S350 and S260 as shown.

Automatic Air Tool S350

The foot controlled standard economy air tool applies the complete range of BAND-IT Jr. Smooth I.D. and Preformed clamps

The IT9000 Electric Bench Mount Tool

- Dial-in electronically controlled tension
- Automatic tail ejection
- Automatic Lock/cut-off
- Heavy duty gearing
- Automatic reset
- 22 inch single-pull take-up
- Unique long-life gripping system
- Unmatched accuracy and repeatability
- Designed to install Ultra-Lok, Jr. and Center Punch Clamps
- Computer controlled

Ultra-Lok Application Tools

UL9010 Portable Electric Tool

Ideal for hose clamping, this powerful hand-held tool can apply 1/2" and 3/4" Ultra-Lok clamps, either preformed or free-end anywhere you can plug into an AC outlet. Adjustable speed and torque controls guarantee consistent tensioning and one-person operation saves on labor expenses.

UL2000 Rechargeable Ultra-Lok Tool

Designed for municipal applications, the UL2000 allows you to install patented Ultra-Lok Free End clamps virtually anywhere. Without generators...without compressors...without unwieldy cords or hoses. The UL2000's unique design allows consistent, repeatable tensioning and locking under full tension. This insures that each and every clamp will have the same strength and holding characteristics.

Is installation time critical? Field tests show that Ultra-Lok clamps can be applied four times faster than conventional band clamps. Not suitable for hose clamping. Use the UL9010.

IT9000 Electric Bench Mount Tool

The IT9000 answers the need for a user-friendly bench tool that makes a precise, repeatable assembly time after time. And to verify actual pull-up tensions, the IT9000 includes a printer port for documentation.

Features include an automatic reset, cut-off and tail ejection, a 22 inch single-pull take-up, heavy duty gearing and electronically controlled clamp installation.

For hose applications, the IT9000 quickly and easily forms assemblies that are as strong as or stronger than crimp or swage fittings at a much lower overall cost.

Interchangeable heads for BAND-IT Jr. Clamps and Center Punch clamps are also available. Video available at www.band-it-idex.com

Enter the type of clamp, clamp width and type of steel. Insert clamp tail and press foot pedal. When the programmed tension is reached, cutoff and tail ejection are automatic.
